

Zytonic[®] Kit

10kg

Zytonic M
(Mycorrhizal Biofertilizer)

4kg

Zytonic NPK
(Carrier Based Consortia)

2kg

Zytonic Zinc
(Zinc Solubilizing Bacteria)

For All Crops

Available in 16 kg pack

Store in a cool & dry place, away from direct sunlight & heat

Benefits

- Better germination with higher plant survival
- Improved soil water infiltration and holding capacity
- Balanced nutrition availability for improved crop health and immunity
- Improved overall soil health: Soft, aerated & porous soils with enhanced biological activity

Dosage

1 unit Zytonic Kit /1 acre

(10 kg Zytonic M, 4 kg Zytonic NPK, 2 kg Zytonic Zinc)

Application Methodology

Basal Application: At the time of field preparation, mix Zytonic Kit with 1-3 MT Godhan enriched FYM and spread in the field. Mix it in soil by rotovating or ploughing

Top dressing: Dissolve Zytonic Kit in water (1:100) and keep for 12 hours. Drench / apply with irrigation

OR

Mix Zytonic Kit with Godhan enriched FYM, broadcast in field and irrigate

Note:

- While preparing Zytonic Solution, first add the powder in a container and then slowly add water while stirring to ensure proper dissolution
- For drip application, filter the solution before passing through the drip system
