

Zytonic[®] Suraksha

Zinc Solubilizing Biofertilizer for Foliar Application

Available in 1.1 kg pack

Store in a cool & dry place, away from direct sunlight & heat

Benefits

- More greenery with less water
- Improved overall plant immunity
- Enhanced and faster growth
- Improved quality & shelf-life of flowers and fruits
- Increase in drought resistance of the crop

Dosage

Zytonic Suraksha: 1.1 kg (covers minimum 1 acre depending on crop canopy size)

Application Methodology

- Dissolve Zytonic Suraksha powder in 20-40 litres water to make stock solution. Keep this solution for 12-24 hours.
- Add more water to make a 100-200 litre solution. Spray uniformly covering complete crop canopy
- This method will give farmers the complete benefit of growth & stress protection

Note:

- For best results, spray before 10 AM or 2 hours before sunset
- For added protection from pests and diseases, use Zytonic Neem along with Zytonic Suraksha

Ingredients: Zinc Solubilizing Bacteria (Water Soluble)

Viable cell count = CFU Min. 5×10^7 cells/g
