

Zytonic[®] Neem

Natural Crop Protector

Zydex[®]
Innovating for Sustainability

**Natural crop protector effective
from the first crop cycle...**

NOW POSSIBLE!

With growing concerns about the impact of chemicals on our health and the environment, Zydex's latest crop care innovation- Zytonic Neem is organic certified and offers a natural and effective alternative that could transform the future of crop care. It relies on the natural repellence mechanism of neem oil to control pathogenic microbes, without the need for toxic chemicals. This approach has been used for millions of years in nature and has proven to be effective in protecting crops.

One of the key advantages of Zytonic Neem is that it works on repellence rather than the kill mechanism. This reduces the possibility of chemically-induced mutations of pathogenic microbial communities. Furthermore, the use of Zytonic Neem helps to improve plant immunity.

The shift towards regenerative and sustainable agriculture practices is gaining momentum, and Zytonic Neem along with Zycoshield is at the forefront of this movement. By combining the two, labour cost can be optimized and farmers get the benefit of growth and protection.

Zytonic[®] Neem

Natural Crop Protector

Benefits:

- Organic certified natural crop protector
- Prevents multiplication and spread of pests and diseases
- Helps reduce crop care chemical residues
- Bio-degradable formulation

Dosage:

1 quart Zytonic Neem per 55 gallons of water

Application method: (Shake well before use)

1 Thoroughly mix Zytonic Neem in water

2 Apply as a foliar spray every fortnight while ensuring complete canopy coverage

Note:

For the added benefit of growth, use Zycoshield along with Zytonic Neem
