

ZycoShield[®]

Foliar Protection

Zydex[®]
Innovating for Sustainability

Zydex's new biotechnology - ZycoShield, offers farmers the combined benefit of crop protection and growth. It protects agricultural crops from abiotic stresses caused by high temperatures, winds, and dry spells, which can result in poor growth. This technology enhances photosynthesis and boosts plant resilience against these stresses. The remarkable performance of ZycoShield is noticeable within 7-15 days of its foliar application.

ZycoShield[®]

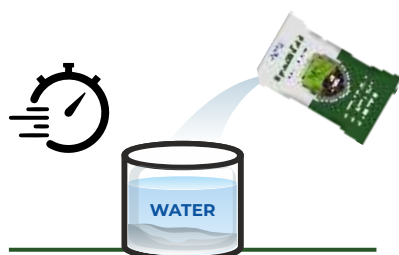

Foliar Protection

Benefits

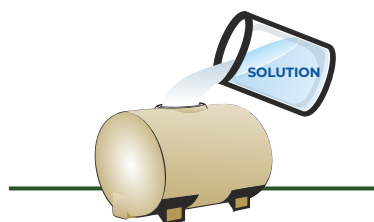

- Enhanced growth and greenery
- Improved drought resistance
- Protection from heat stroke
- Reduction in irrigation
- Enhanced quality & shelf-life of flowers and fruits
- Improved health and overall immunity

Application Rate: 2-3 lbs/acre

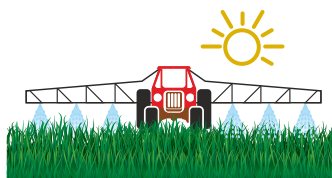

Application method

1 Add ZycoShield in 30-40 gallons of water and leave until complete dissolution

2 Add this solution to the spray tank and mix in other crop care chemicals (fungicides, insecticides, etc.)

3 Apply as a foliar spray as per standard practice (aerial or ground application)
Time the application preferably in the morning or late afternoon

Note:

- Easy to mix & compatible with most crop care solutions including fungicides, insecticides and foliar fertilizers (except cationic - based substances)
- Stable over a broad pH range and water hardness
