

ZycoShield

Foliar Protection

**Sustainable farming for nutritious,
safe and affordable food for all**

Benefits

- More greenery with less water
- Improved overall plant immunity
- Enhanced and faster growth
- Improved quality & shelf-life of flowers and fruits
- Increase in drought resistance of the crop

Dose: ZycoShield: 1 kg (Covers 1-1.5 acres depending on crop canopy size)

Application :

- Mix ZycoShield powder in 100 liter water and keep it for 12 to 24 hours.
- Add more water as needed to cover one acre area.
- Spray the crop uniformly by properly drenching the plants.

For best results spray before 10 am or two hours before the sunset.

This method will give farmers the complete benefit of growth & stress protection

Ingredients:

Zinc Solubilizing Biofertilizer (water soluble powder)

- Viable cell count = CFU Min. 5×10^7 cells/g

Store in a cool & dry place,
away from direct sunlight & heat
