

# Zytonic<sup>®</sup>Active

Super-Spreader Adjuvant  
for Superior Performance

## Benefits

- New generation adjuvant technology
- Enhanced spreading and reduction of crop care (technicals including herbicides) up to 50%, with extended efficacy
- Reduced phytotoxicity
- Enhanced photosynthesis with higher overall growth
- Improved retention / adhesion & resistance to being washed out during rains (wash-off resistance)

## Dosage

1-3 ml / litre

## For All Crops

Available in 250 ml and  
15 ml sachet

Store in a cool & dry place, away  
from direct sunlight & heat

## Application Methodology:

- Mix the recommended dose of Zytonic Active with the needed dose of crop care chemicals
  - Wait for 10 mins (minimum). Add water & spray
- OR**
- For the added benefit of mist control, prepare two solutions as follows:

**Solution 1:** Take 10-15 liters of water and add 5-10 ml of Zytonic Mist Control while stirring. Wait for 10 minutes (minimum)

**Solution 2:** Mix the recommended dose of Zytonic Active with the needed dose of crop care chemicals and wait for 10 minutes (minimum)

Mix the above two solutions together and spray.

## Note:

- For the added benefit of Mist Control, use Zytonic Mist Control along with Zytonic Active
- Zytonic Active is easy to mix & compatible with most crop care chemicals. Check stability before bulk mixing
- Stable over a broad pH range and water hardness (Extreme hardness above 1,000 ppm to be avoided)

**Ingredients:** Polymeric Wetting Agent: 30%  
Formulation Aids and Inerts: 70%
