

Zytonic[®]K

Potassium Mobilizing Bio-Fertilizer

Benefits

- Enhanced crop quality & overall yields
- Improved water regulation
- Improved fruit or grain quality
- Prevents energy losses & improves plant energy efficiency
- Reduces lodging & crop diseases

For All Crops

Available in 2 kg pack &
15 kg Drum (500 gms x 30 packs)

Store in a cool & dry place, away
from direct sunlight & heat

Dosage

- Pre Pre Basal application : 2-4 kg Zytonic K/ acre
- Foliar Spray: 2 kg Zytonic K/ acre
- Prior to Flowering : 2-4 kg Zytonic K / acre

Application Methodology

Pre Pre Basal application : At the time of land preparation, mix Zytonic K with Zytonic Godhan enriched FYM and broadcast on the field and mix by rotovation or ploughing

Foliar spray & prior to flowering: Dissolve Zytonic K in water (1:100). Wait for 12-24 hours & spray

OR

Mix with Zytonic Godhan enriched FYM, broadcast on the field and irrigate

Ingredients: Potassium Mobilizing Bio-Fertilizer (Water Soluble)

Viable cell count = CFU $\geq 5 \times 10^7$ cells / g

Note:

- For best results, the use of Zytonic K in combination with Zytonic M is recommended prior to the flowering stage
- While preparing Zytonic Solution, first add the powder in a container and then slowly add water while stirring to ensure proper dissolution
- For drip application, filter the solution with 80 mesh cloth or higher, before passing through the drip system
