

# Zytonic<sup>®</sup> Nursery Kit

**1,250g**

**Zytonic M**  
(Mycorrhizal Biofertilizer)

**500g**

**Zytonic NPK**  
(Carrier Based Consortia)

**250g**

**Zytonic Zinc**  
(Zinc Solubilizing Bacteria)

**For All Crops**

**Available in 2 kg pack**

Store in a cool & dry place, away  
from direct sunlight & heat

## Benefits

- Better germination with higher plant survival
- Soft and porous soil helps in easy uprooting of nursery
- Well developed root zone reduces the impact of transplanting shock

## Dosage

1 unit Zytonic Nursery Kit for 500 Sq. m  
(1,250g Zytonic M, 500g Zytonic NPK, 250g Zytonic Zinc)

## Application Methodology

### Soil Application

(For nursery, fodder crops and kitchen garden)

- Mix all the components of the nursery kit together, mix it with 100kg Zytonic Godhan bio-digested farm yard manure
- Add this to the soil and rotovate
- Now add the seeds and irrigate

### Drip/Drenching Application:

(For all the crops in the entire crop cycle)

- Add all the components of the nursery kit in 200 liters water and mix well. Keep the solution aside for 12 hours
- Filter the solution using 80 mesh cloth and apply through the drip line or drench the plants

### Note:

- While preparing Zytonic Solution, first add the powder in a container and then slowly add water while stirring to ensure proper dissolution
- For drip application, keep it overnight and filter the solution before passing through the drip system
